PORTFOLIO

khuntupi.tech

GITHUB

github.com/kyawhla-commit

CORE STACK

React.js

TypeScript

Kotlin

React Native

NestJS

Node.js

Laravel

PostgreSQL

LANGUAGES

Pa-O - Native

Burmese - Fluent

English - Intermediate

FULL-STACK WEB & MOBILE DEVELOPER

KHUN KYAW HLA

React.js | TypeScript | NestJS | Node.js | PostgreSQL | Kotlin | React Native

01 Professional Summary

Full-Stack Web and Mobile Developer building enterprise applications with React.js, TypeScript, NestJS, Node.js, PostgreSQL, and MySQL. Experienced in developing frontend modules, RESTful APIs, database-backed workflows, dashboards, reports, and system integrations for smart parking, manufacturing, and healthcare platforms. Mobile development experience includes native Android applications with Kotlin and React Native applications, alongside AI-camera and kiosk-hardware integration.

02 Professional Experience

JANUARY 2026 - PRESENT

Full-Stack Web Developer

M-Tech (Myo & Moe Technology Co., Ltd.)

- Develop and maintain enterprise web applications using React.js, TypeScript, NestJS, and Node.js.
- Deliver end-to-end functionality across user interfaces, RESTful API endpoints, backend services, and PostgreSQL or MySQL persistence using TypeORM.
- Implement operational workflows, dashboards, reports, search, filtering, pagination, and data validation.
- Integrate frontend modules with backend APIs and database services, testing request and response behavior with Postman.
- Troubleshoot frontend, backend, API, and database issues while maintaining application reliability and improving performance.
- Collaborate through Git and GitHub to manage source code and coordinate application changes.

03 Technical Skills

FRONTEND

React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

BACKEND

NestJS, Node.js, Express.js, Laravel, PHP

MOBILE

Kotlin, Android, React Native, Google Play Console

DATABASES & ORM

PostgreSQL, MySQL, TypeORM, Database Design

APIS & INTEGRATION

RESTful APIs, API Integration, AI-Camera Integration, Kiosk and Hardware Integration

CLOUD & DEPLOYMENT

AWS EC2, DigitalOcean Droplets, Cloudflare Pages, Vercel, GitHub Pages, Ubuntu Linux, NSSM, Windows Services

DEVELOPMENT TOOLS

Git, GitHub, Postman, Visual Studio Code

Enterprise & Mobile Projects

Smart Car Parking Management System

[React.js](#) | [TypeScript](#) | [NestJS](#) | [PostgreSQL](#) | [AI Camera](#)

Enterprise platform supporting real-world parking operations, transactions, access passes, rates, users, lanes, reports, and connected devices.

- Developed application modules for transactions, dashboards, reporting, pass management, and rate management.
- Contributed across the React frontend and NestJS/PostgreSQL application stack to implement operational parking workflows.
- Integrated an AI-powered camera system for automatic vehicle license-plate detection and recognition.

Smart Factory Management System

[React.js](#) | [TypeScript](#) | [NestJS](#) | [PostgreSQL](#) | [Kiosk Hardware](#)

Manufacturing platform supporting production planning, machine monitoring, warehouse operations, inventory, and performance analysis.

- Developed manufacturing workflows for production planning, job and machine monitoring, warehouse operations, and inventory management.
- Implemented OEE dashboards, production reporting, and QR-code functionality for operational monitoring.
- Integrated kiosk hardware with backend APIs for on-site workflows and real-time operational updates.

Blood Bank Management System

[React.js](#) | [TypeScript](#) | [NestJS](#) | [PostgreSQL](#)

Healthcare operational platform for blood donors, inventory, hospitals, blood requests, and operational records.

- Developed workflows for blood donors, inventory, hospitals, blood requests, and operational records.
- Implemented RESTful APIs, database-backed CRUD functionality, and form validation across the application.
- Troubleshoot frontend, backend, API, and database issues affecting operational workflows.

04 Personal Projects

YBS Way

[Kotlin](#) | [Android](#)

Native Android application developed in Kotlin for YBS route search and Yangon public-transport information.

- Created reusable native Android UI components and screen navigation.
- Adapted layouts across Android screen sizes.

Live app: ybs-way-web.pages.dev

Spendly

[React Native](#) | [TypeScript](#)

Mobile personal-finance application for recording and monitoring income and expenses.

- Implemented transaction management, categories, and spending summaries.
- Managed application state and mobile UI workflows using React Native and TypeScript.

05 Education

Bachelor of Arts in Geography
Pinlon University

06 Certifications

- Professional Web Developer - Laravel and PHP
- Professional Web Developer - React.js, Next.js and Express.js
- Professional UI/UX Design - Fairway Technology
