

KHUN KYAW HLA

Full-Stack Web & Mobile Developer

bwarpay.bp8@gmail.com | +95 9 677 066 891 | Yangon, Myanmar
khuntupi.tech | [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Web and Mobile Developer building enterprise applications with React.js, TypeScript, NestJS, Node.js, PostgreSQL, and MySQL. Experienced in developing frontend modules, RESTful APIs, database-backed workflows, dashboards, reports, and system integrations for smart parking, manufacturing, and healthcare platforms. Mobile development experience includes native Android applications with Kotlin and React Native applications, alongside AI-camera and kiosk-hardware integration.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: NestJS, Node.js, Express.js, Laravel, PHP

Mobile: Kotlin, Android, React Native, Google Play Console

Databases and ORM: PostgreSQL, MySQL, TypeORM, Database Design

APIs and Integration: RESTful APIs, API Integration, AI-Camera Integration, Kiosk and Hardware Integration

Cloud and Deployment: AWS EC2, DigitalOcean Droplets, Cloudflare Pages, Vercel, GitHub Pages, Ubuntu Linux, NSSM, Windows Services, On-Premises Deployment

Development Tools: Git, GitHub, Postman, Visual Studio Code

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer

M-Tech (Myo & Moe Technology Co., Ltd.) | January 2026 - Present

- Develop and maintain enterprise web applications using React.js, TypeScript, NestJS, and Node.js.
- Deliver end-to-end functionality across user interfaces, RESTful API endpoints, backend services, and PostgreSQL or MySQL persistence using TypeORM.
- Implement operational workflows, dashboards, reports, search, filtering, pagination, and data validation.
- Integrate frontend modules with backend APIs and database services, testing request and response behavior with Postman.
- Troubleshoot frontend, backend, API, and database issues while maintaining application reliability and improving performance.
- Collaborate through Git and GitHub to manage source code and coordinate application changes.

SELECTED ENTERPRISE PROJECTS

Smart Car Parking Management System

[React.js](#) | [TypeScript](#) | [NestJS](#) | [PostgreSQL](#) | [AI Camera](#)

- Developed application modules supporting parking transactions, access passes, parking rates, users, lanes, dashboards, reports, and connected devices.
- Contributed across the React frontend and NestJS/PostgreSQL application stack to implement operational parking-management workflows.
- Integrated an AI-powered camera system for automatic vehicle license-plate detection and recognition.

Smart Factory Management System

[React.js](#) | [TypeScript](#) | [NestJS](#) | [PostgreSQL](#) | [Kiosk Hardware](#)

- Developed manufacturing workflows for production planning, job and machine monitoring, warehouse operations, and inventory management.
- Implemented OEE dashboards, production reporting, and QR-code functionality for operational monitoring.
- Integrated kiosk hardware with backend APIs to support on-site workflows and real-time operational updates.

Blood Bank Management System

[React.js](#) | [TypeScript](#) | [NestJS](#) | [PostgreSQL](#)

- Developed workflows for blood donors, inventory, hospitals, blood requests, and operational records.
- Implemented RESTful APIs, database-backed CRUD functionality, and form validation across the application.
- Troubleshooted frontend, backend, API, and database issues affecting operational workflows.

PERSONAL PROJECTS

YBS Way - Public Transportation Mobile App

[Kotlin](#) | [Android](#)

- Developed a native Android application in Kotlin for YBS bus-route search and Yangon public-transport information.
- Created reusable native Android UI components, screen navigation, and adaptive layouts for different screen sizes.

Live app: ybs-way-web.pages.dev

Spendly - Expense Tracker Mobile App

[React Native](#) | [TypeScript](#)

- Developed a mobile personal-finance application for recording and monitoring income and expenses.
- Implemented transaction management, categories, spending summaries, application-state handling, and mobile UI workflows.

Repository: github.com/kyawhla-commit

CERTIFICATIONS

- Professional Web Developer - Laravel and PHP
- Professional Web Developer - React.js, Next.js and Express.js
- Professional UI/UX Design - Fairway Technology

EDUCATION

Bachelor of Arts in Geography

Pinlon University
